

## BHAKTI VYAS

Aspiring Data Analyst | SQL | Python | Power BI

[vbhakti7@gmail.com](mailto:vbhakti7@gmail.com) | +1(803) 597-0835 | <https://www.linkedin.com/in/bhakti-vyas-a64aa3348/>

---

### EDUCATION

**Long Island University, Brooklyn, New York**

**Sep 2024 – May 2026**

Master of Science in Computer Science

**KJ Institute of Engineering, Savli, Gujarat**

**July 2017 - May 2021**

Bachelor of Engineering in Computer Engineering

**Aerostar Jet Training Academy**

**August 2016 - October**

**2017**

Diploma in Airport Management

### EXPERIENCE

**Computer Operator**

**Agri Business Center September 2022 – May 2024**

- Managed and analyzed business data using Excel, tracking key metrics to support day-to-day operations.
- Built reports summarizing sales and performance data to identify trends and support business growth strategies.

**Frontend Developer Intern**

**Webmyne Systems Private Limited July 2020 – May 2021**

- Built the frontend of an insurance application enabling paperless workflows for a banking client, improving process efficiency and reducing manual paperwork.

### ACADEMIC PROJECTS

**Bookstore Data Analysis System | Team size: 1**

**Long Island University, Brooklyn, New York Jan 2025 – Apr 2025**

- Designed and developed a Bookstore Data Analysis System to analyze customer purchasing behavior, identifying top-selling genres and seasonal sales trends to support data-driven decision-making.
- Utilized SQL and Python (Pandas) to clean, transform, and analyze large datasets, extracting insights on user preferences, sales performance, and inventory patterns.
- Developed an interactive dashboard using Power BI to visualize revenue trends, category-wise performance, and customer buying patterns for easy interpretation by stakeholders.
- Implemented data-driven recommendations to optimize inventory management and improve sales strategies, enhancing overall business efficiency.

**Fire Detection System using IoT and Machine Learning | Team size: 2**

**Long Island University, Brooklyn, New York Jan 2025 – May 2025**

- Designed and developed a smart fire detection system using IoT devices and machine learning models to analyze real-time sensor and image data, improving early fire detection accuracy.
- Utilized Python, TensorFlow, and OpenCV to process and analyze visual and environmental data, achieving 97% detection accuracy across multiple test scenarios.
- Built a real-time monitoring and alert system to automatically notify users and emergency services, reducing response time and enhancing safety measures.
- Performed data preprocessing and feature extraction on sensor and image datasets to improve model performance and ensure reliable predictions in real-world conditions.

**ReWear Donation Management and Data Analysis System | Team size: 1**

**Long Island University, Brooklyn, New York Jan 2025 – Apr 2025**

- Designed and developed a ReWear platform to streamline clothing donation and pickup processes, enabling efficient coordination between users and NGOs.
- Analyzed donation data to identify peak donation periods, high-demand locations, and user behavior patterns to improve operational efficiency.
- Utilized SQL and Python (Pandas) to clean, transform, and analyze datasets, generating actionable insights

for optimizing pickup routes and inventory distribution.

- Developed an interactive dashboard using Power BI to visualize donation trends, request volumes, and fulfillment rates for better decision-making.

### **E-Commerce Sales Data Analysis | Team size: 1**

Personal Project   May 2026 – Jun 2026

- Analyzed large-scale e-commerce sales dataset to identify customer purchasing behavior, top-selling products, and revenue trends across different regions.
- Utilized SQL to extract, filter, and aggregate data, generating insights on sales performance, customer segmentation, and product demand.
- Performed data cleaning and exploratory data analysis (EDA) using Python (Pandas, NumPy) to uncover patterns and correlations in customer transactions.
- Developed interactive dashboards using Power BI to visualize KPIs such as monthly revenue, category performance, and customer retention metrics, enabling data-driven business decisions.

### **SKILLS**

- **Data Analysis:** Excel, SQL, Python (Pandas, NumPy)
- **Visualization:** Power BI, Tableau
- **Tools:** Jupyter Notebook, Git, VS Code
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Other:** Data Cleaning, Exploratory Data Analysis (EDA), Statistics

### **CERTIFICATIONS**

- Python
- Data Structures and Algorithms
- Data Science (Cisco)
